## DETAILED ACTION

### *Prelim./Amdt.*

1. Receipt is acknowledged of the amendment filed 02/03/2005.
2. Claims 1-19 are pending and claim 20 has been cancelled.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tanaka et al. (US 6,474,826 B1).

Re claims 19: Tanaka discloses a planar surface illuminator having a light guide plate (10 in Fig. 25) comprising an optical input surface (17), a plurality of LEDs (40 in Fig. 25) positioned beside the light guide plate, a number of scattering structures positioned (15 in Fig. 25) around the optical input surface and essentially between the point light sources and a center of the light guide plate; wherein each of the LEDs is equipped with more than one of said scattering structures (15 in Fig. 25) for converting Gaussian beams emitted by each of the point light sources to light beams having a uniform light intensity across corresponding widths thereof, for transmitting through the optical input surface into the light guide plate.

### *Allowable Subject Matter*

5. Claims 1-18 are allowed.

Art Unit: 2875

6. The following is an examiner's statement of reasons for allowance: With regard to independent claim 1, the prior art of record does not disclose a planar surface illuminator, configured as claimed, wherein a group of at least three scattering dots, one group for each one point light source, is presented for converting Gaussian beams emitted by the point light sources to light beams having a uniform light intensity across their widths. Claims 2-18 depend from claim 1. Therefore, claims 1-18 are patentable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### *Conclusion*

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
